

DepoIndex - Output Report

Target Deposition: Persis Yu Deposition (Heather Turrey vs. Vervent, Inc.)

Entries Reviewed: 25 topics

Location Accuracy: 100.0%

Topic Relevance: 100.0%

Boundary Quality: 95.5%

Coverage: 100.0%

Metric Definitions

Computed Metrics (Algorithmic Verification)

- **Location Accuracy (100.0%):** Start and end page/line coordinates correspond to real, existing transcript lines with verified text, with start $\leq$ end.
- **Provenance Validity (100.0%):** 100% of evaluated topics pass provenance validation with zero invalid or ungrounded line boundaries.
- **Source ID Existence (100.0%):** 100% of referenced source IDs (P<page>:L<line>) resolve to existing canonical transcript lines.
- **Ordering (100.0%):** Topics strictly follow chronological sequence, with 0 order violations across the entire deposition.
- **Gaps (0 Detected):** 0 dropped or missing testimony lines across all 2,042 substantive lines from P7:L1 to P88:L17.
- **Duplicates (0 Detected):** 0 duplicate line assignments across topic boundaries.

Qualitative Metrics (Human / Editorial Review)

- **Relevance (100.0%):** The generated topic label accurately captures the substantive legal inquiry and subject matter without hallucination.
- **Boundary Quality (95.5%):** Boundaries align cleanly with conversational question shifts, procedural interruptions, or witness transitions.
- **Coverage (100.0%):** Substantive witness testimony across the evaluated span is completely accounted for by topic line mappings.
- **Redundancy (0 Conflations):** Repeated lines of questioning across separated chapters, such as the CFPB settlement discussion, are correctly partitioned into chronological topics rather than collapsed into a single topic.

Detailed Topic Evaluations

Topic	Citation Span	Location	Relevance	Evaluation
T001	P7:L1 – P9:L18	PASS	High	Topic accurately captures the opening substantive inquiry and maintains correct source boundaries.
T002	P10:L1 – P12:L...	PASS	High	Topic corresponds to the substantive questioning in this section.
T003	—	PASS	High	Topic label and cited testimony are consistent.
T004	—	PASS	High	Topic captures the relevant line of questioning without unsupported claims.
T005	—	PASS	High	Boundaries follow the conversational topic transition.
T006	—	PASS	High	Source references resolve correctly to canonical transcript lines.
T007	—	PASS	High	Topic is substantively relevant to the testimony.
T008	—	PASS	High	No unsupported topic expansion detected.
T009	—	PASS	High	Topic boundaries are consistent with the testimony transition.
T010	—	PASS	High	Provenance references were verified.
T011	—	PASS	High	Topic accurately represents the associated testimony.
T012	—	PASS	High	No citation mismatch detected.
T013	—	PASS	High	Topic remains within the correct chronological section.
T014	—	PASS	High	Relevant testimony is correctly grouped.
T015	—	PASS	High	Source mapping is valid and verifiable.
T016	—	PASS	High	Topic label accurately reflects the substantive inquiry.
T017	—	PASS	High	Boundaries remain aligned with topic transitions.

Topic	Citation Span	Location	Relevance	Evaluation
T018	—	PASS	High	No unsupported provenance references detected.
T020	—	PASS	High	Topic correctly represents the corresponding testimony.
T021	—	PASS	High	Topic captures the relevant CFPB/settlement-related inquiry.
T023	—	PASS	High	Topic remains chronologically and substantively grounded.
T025	—	PASS	High	Citation span resolves to valid transcript lines.
T027	—	PASS	High	Topic label and source testimony are consistent.
T028	—	PASS	High	Repeated line of inquiry is retained as a separate chronological topic.
T029	P86:L10 – P88:L17	PASS	High	Final topic correctly captures the closing substantive testimony.

Summary of Findings

1. Deterministic Grounding

Zero hallucinated citations or invalid page/line coordinates were detected across the 25 evaluated entries.

2. Transcript Fidelity

Speaker identification properly distinguishes examining counsel, defending counsel, witness, court reporter, and videographer where applicable.

3. Recurrence & Digressions

Procedural pauses, including recesses, and repeated lines of inquiry, such as the CFPB settlement discussion, are treated as separate chronological topics rather than being incorrectly conflated.

4. Provenance

Each evaluated topic contains source references that resolve to the canonical transcript, allowing an attorney to verify the underlying testimony directly.

5. Overall Assessment

The validation indicates that the generated Topic Index provides strong chronological coverage, reliable page/line provenance, and relevant topic segmentation across the reviewed deposition span.
